DRILL BITS

Ruwag offers users a complete range of the highest quality drill bits, to take on any project with confidence. Ruwag...the professional's choice!

Ruwag packaging

Our well designed bold and informative packaging, attracts attention and reinforces the Ruwag brand, whilst providing customers with all the information they need at a quick glance.

Clear labeling indicates type of bit and intended application.

Intended application is easily identified by relevant material image.

Icons quickly indicate range of materials suited for drilling and additional special features if any.

Quality levels are indicated by a Life Rating and corresponding prominent colour coding.

MORE

Standard Metal

The general purpose, standard metal drill bits are rugged and low cost and are suitable for users of all skill levels. They are not as hard wearing as their industrial metal counterparts and are thus better suited for light to medium duty drilling applications around the home.

- Made of High Speed Steel
- Roll forged

Carded

Industrial Metal

The general purpose, industrial metal bits are of a higher quality and are more precise when drilling and are thus suitable for intermediate skilled level users. The bits are harder wearing and are thus the perfect choice for tradesmen or users faced with a medium to heavy duty drilling task.

- Made of High Speed Steel
- Precision ground
- Split point to prevent bit wandering

Industrial Metal - Double ended stubs

This high quality, general purpose, precision metal drill bit is best suited for intermediate skilled level users.

- Made of High Speed Steel
- Precision ground
- Split point to prevent bit wandering
- Specifically for use in thin metal sheets

TITANIUM METAL

Titanium Metal

Titanium metal bits offer excellent drilling performance into metal due to their titanium coating, enabling increased speed and longevity. This makes them ideal for heavy duty drilling tasks.

- Made of High Speed Steel
- Precision ground
- Split point to prevent bit wandering
- Titanium coated

Cobalt Metal

This premium quality, specialised, precision metal drill bit contains Cobalt for extreme performance and/or specialised materials. This drill bit is only suitable for advanced skilled level users.

- Made of High Speed Steel with 5% Cobalt content
- Precision ground
- Split point to prevent bit wandering

Turbo Metal

This premium quality, precision metal drill bit, features a 2 stage cutting action which delivers a more effective and faster drilling performance.

- Made of performance High Speed Steel
- Precision ground with variable core thickness
- Split point to prevent bit wandering
- 2 stage cutting action
- Flute thickness decreases in direction of the tip

RSES5P 5pce Screw Extractor Set

EXTRACTOR	DRILL SIZE	BOLT SIZE	QTY
#1	3mm	3-6mm	1
#2	4mm	6-8mm	1
#3	5mm	8-11mm	1
#4	6mm	11-14mm	1
#5	7mm	14-18mm	1

Screw Extractors are used to remove bolts or screws when their heads have broken off.
- Made of Carbon Steel

Standard Brick

Standard brick bits perform best when drilling into plaster and brick, but aren't ideally suited for harder materials such as concrete or granite. This makes them perfect for DIY applications such as drilling holes into walls for hanging mirrors, etc.

- Tungsten carbide tip

RUWAG HANDY HINT

If holes are drilled beyond the length of the flutes of the drill bit, the bit will lose the ability to clear debris causing it to seize in the hole and may result in damage to the drill bit or drilling machine.

Industrial Concrete

Industrial concrete bits are hard wearing and are better suited to drilling into harder materials such as concrete; they perform brilliantly when drilling into plaster and brick. - Profiled tungsten carbide tip

RUWAG HANDY HINT

If holes are drilled beyond the length of the flutes of the drill bit, the bit will lose the ability to clear debris causing it to seize in the hole and may result in damage to the drill bit or drilling machine.

Turbo Concrete

Turbo concrete bits offer fast drilling performance into concrete due to their unique rotary hammer grade centring tip.

- Facetted tungsten carbide tip
- Turbo performance

RUWAG HANDY HINT

If holes are drilled beyond the length of the flutes of the drill bit, the bit will lose the ability to clear debris causing it to seize in the hole and may result in damage to the drill bit or drilling machine.

If holes are drilled beyond the length of the flutes of the drill bit, the bit will lose the ability to clear debris causing it to seize in the hole and may result in damage to the drill bit or drilling machine.

Multi-Purpose

Multi-purpose bits are designed for drilling through a combination of building materials, such as through thin sheet metal into a brick wall. These bits are ideal for the building trade.

- Precision ground
- Tungsten carbide tip

SDS INDUSTRIAL PLUS CORE BIT

SDS Industrial Plus Core Bit

These bits are used to cut large diameter holes into brick and concrete.

- Tungsten carbide tip
- Available with SDS and hexagonal shanks

SDS Plus Industrial

The industrial duty drill bits should be used with rotary hammer power tools with the appropriate SDS plus chuck.

- Tungsten carbide tip
- PGM certified

Only drill bits manufactured with state of the art technology within strict tolerance limits are granted use of the PGM (Prüfgemeinschaft Mauerbohrer) mark. The mark guarantees geometrically exact holes so that fasteners used will give firm support and achieve rated values.

SDS Plus Professional

This professional quality drill bit should be used with rotary hammer power tools with the appropriate SDS plus chuck.

- Profiled tungsten carbide tip
- PGM certified
- Unique flute design

Only drill bits manufactured with state of the art technology within strict tolerance limits are granted use of the PGM (Prüfgemeinschaft Mauerbohrer) mark. The mark guarantees geometrically exact holes so that fasteners used will give firm support and achieve rated values.

- Unique cutting tip cuts through rebar

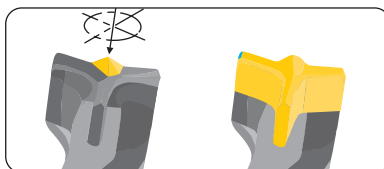

- Tungsten carbide tip
- Rotary impact
- Precision ground

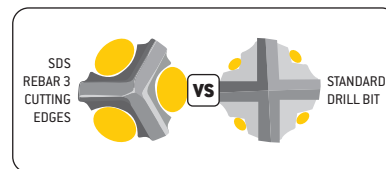

Perfect Holes

The 120° angle guarantees perfect concentric holes (3x120°=360).
The booster enables straight drilling.

Precision Monoblock Carbide Tip

Self centering tip design drives the bit straight. 135° angle gives a better chiseling effect.

Better Dust Removal Capacities

The 3 cutting edge design offers the largest dust removal in the market.

SDS ReBar

This professional quality drill bit should be used with rotary hammer power tools with the appropriate SDS plus chuck.

- 3 cutter tungsten carbide tip
- PGM certified
- Unique cutting tip cuts through rebar
- Triple flute design

Only drill bits manufactured with state of the art technology within strict tolerance limits are granted use of the PGM (Prüfgemeinschaft Mauerbohrer) mark. The mark guarantees geometrically exact holes so that fasteners used will give firm support and achieve rated values.

Ruwag's SDS Professional Max drill bits feature "Y" cutting tip geometry.

Only drill bits manufactured with state of the art technology within strict tolerance limits are granted use of the PGM (Prüfgemeinschaft Mauerbohrer) mark. The mark guarantees geometrically exact holes so that fasteners used will give firm support and achieve rated values.

SDS Max

This professional quality drill bit should be used with rotary hammer power tools with the appropriate SDS max chuck.

- Y-cutter profiled tungsten carbide tip
- PGM certified
- Unique flute design

Ceramic Tile bit	✓	✓	✓	✓	✓	✓		
Diamond core bit	✓	✓	✓	✓	✓	✓	✓	✓

Tile Ratings

- Class 0:** Unsuitable for floors. These are generally used as wall tile.
- Class 1:** Suitable only for locations where softer footwear is worn or where shoes are not frequently used, for e.g. residential bathroom or other areas with light traffic. Also for interior commercial and residential walls.
- Class 2:** Suited for general residential traffic; for areas that are walked on by soft soled or "normal" footwear with very small amounts of scratching dirt. Not for kitchen, entrance halls, stairs and other areas subjected to heavy traffic.
- Class 3:** Suited for all residential and light commercial areas such as offices, reception areas, boutiques, interior walls, countertops and residential bathroom floors. Not recommended for commercial entryway.
- Class 4:** Suited for regular traffic. Recommended for medium commercial and light institutional use, such as restaurants, hotels, hospital lobbies and corridors.
- Class 5:** Suitable for areas with heavy traffic, abrasive dirt and moisture, and where safety and maximum performance are required. Examples are shopping centres, public buildings, building entrances or swimming pools.

Glass & Tile

The glass and tile bit is used for drilling into glass and medium wear tiles.

- Profiled tungsten carbide tip
- For use in up to class 3 tiles

RUWAG HANDY HINT

When drilling tiles with a centreless diamond core bit, start at a shallow angle until the bit etches a mark in the tile then, while still drilling, gradually bring to a vertical position before drilling the hole through the tile.

HOLESAWS

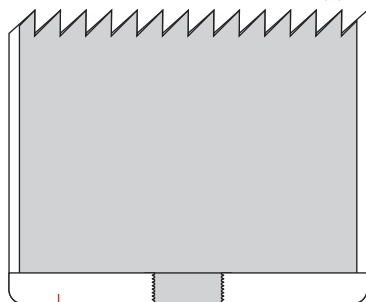

RUWAG Holesaws at a glance

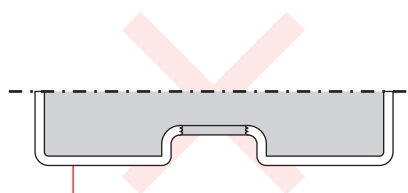

- Ruwag holesaws are made from tough fracture resistant HSS bimetal, ensuring fast accurate cutting and long tool life.
- Available in sizes from 14-210mm, with a maximum cutting depth of 32mm for all sizes.
- Ruwag holesaws give you clean, precise and circular holes in wood, gypsum boards, plastics, non-ferrous metals, aluminium, steel and stainless steel. (Remember to apply even pressure to prevent damage to the teeth.)
- Arbors and pilot drills are sold separately and are also available with an SDS shank for your convenience.

**4-6-TPI VARIO TOOTHING

For best performance of bi-metal saws

- DO** Operate hole saw at recommended speed. See RPM table.
- DO** Apply sufficient feed pressure when sawing, about 80 to 100 pounds per inch of hole saw diameter. (More for harder materials, less for softer.)
- DO** Set the pilot drill point about 1/8" beyond the tooth points - enough to establish and hold a center. Better yet, drill pilot hole with 1/4" drill hit and use 1/4" drill rod for pilot. This is the way the professional does it.
- DO** Use a good grade of cutting oil to assure cleaner cut and longer blade life.
- DO** Chuck the hole saw properly.
- DO** Hold saw perpendicular to the surface of material being cut.
- DO** Hold hole saw and drive unit steady - drill press or lathe is best when possible.
- DO** Be sure to fix arbor to hole saw firmly. Drive pins should be fully engaged in drive pin holes.
- DO** Keep drive pins locked into drive pin holes with threaded retainer.
- DO** Wear safety glasses and keep idle hands away from the sawing operation.
- DON'T** Run a hole saw too fast - it will cut faster at slow speed than at too fast a speed. If it runs too fast it will not cut, but wear out.
- DON'T** Allow tooth points to rub over the work without digging 3n to take a chip. Rubbing the tooth points dulls them so they can't cut.
- DON'T** Set the pilot drill point beyond the tooth points more than the thickness of the work. If the drill pierces the work before the saw teeth are in contact, the saw can hit the work with sufficient shock to break the saw or the teeth.
- DON'T** Operate hole saw without cutting oil (except in cast iron) or the abrasion will cause enough heat to damage the cutting ability of the saw.
- DON'T** Chuck too loosely or off center. An improperly chucked hole saw will cause damaging vibrations.
- DON'T** Try to saw holes at an angle to the work surface. When teeth do not contact the work evenly the hole saw will be twisted out of round and will break.
- DON'T** Allow hole saw and drive unit to wobble or orbit around pilot drill, as this sets up damaging stresses to strip the teeth or break the saw.
- DON'T** Begin sawing with arbor so loose in cap that it will (1) tear out threads in saw cap, or (2) become inseparable (too tightly screwed in).
- DON'T** Allow drive pins to retract from holes while saw is in operation. Loose drive pins can grind a hole in the cap.
- DON'T** Let loose clothing or long hair get near a revolving hole saw.

Contains deeper
blade segments
which increase the
lifespan of the blade.

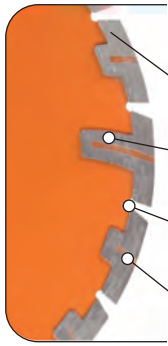

Suitable for wet
or dry cutting.

Standard Diamond Blades

- Stock Brick - Clay Brick - Concrete

PART NO.	DESCRIPTION	QTY
RDBSTD115	115mm Standard Diamond Blade	1
RDBSTD230	230mm Standard Diamond Blade	1

Features	Benefits
+40% Segment height	Long life
Extended cutting segment	Protects blade body when making deep cuts
Slant segments	Efficient debris removal Aggressive cutting action
Turbo segment	Fast cutting action

Contains deeper blade segments which increase the lifespan of the blade.

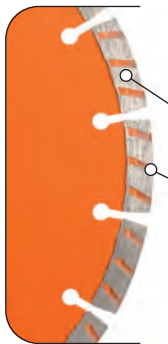

Suitable for wet or dry cutting.

Industrial Diamond Blades

- Sandstone - Soft Cement - Re-inforced Concrete - Cured Concrete

PART NO.	DESCRIPTION	QTY
RDBIND115	115mm Industrial Diamond Blade	1
RDBIND230	230mm Industrial Diamond Blade	1

Features	Benefits
+40% Segment height	Long life
Turbo segment	Fast cutting action

Contains deeper blade segments which increase the lifespan of the blade.

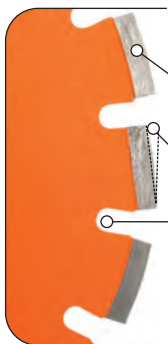

Suitable for wet or dry cutting.

Granite Diamond Blades

- Granite - Slate - Marble - Terrazzo

PART NO.	DESCRIPTION	QTY
RDBINDG115	115mm Granite Diamond Blade	1
RDBINDG230	230mm Granite Diamond Blade	1

Features	Benefits
+40% Segment height	Long life
Wedge segments	Enable plunge cutting
Deep gullet segments	Efficient debris removal Better cooling

Contains deeper blade segments which increase the lifespan of the blade.

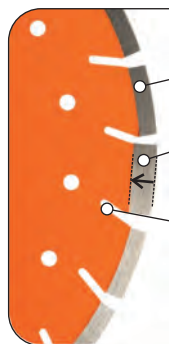

Suitable for wet or dry cutting.

Asphalt Diamond Blades

- Asphalt - Green Concrete (<1 day old)

PART NO.	DESCRIPTION	QTY
RDBINDA230	230mm Asphalt Diamond Blade	1
RDBINDA350	350mm Asphalt Diamond Blade	1

Features	Benefits
+40% Segment height	Long life
Extended cutting segment	Protects blade body when making deep cuts
Slant segments	Efficient debris removal Aggressive cutting action

Contains deeper blade segments which increase the lifespan of the blade.

Suitable for wet or dry cutting.

Cured Concrete Diamond Blades

- Cure Concrete

PART NO.	DESCRIPTION	QTY
RDBINDC350	350mm Cured Concrete Diamond Blade	1

Features	Benefits
Vacuum brazed diamonds	Cuts a wide variety of materials
Large grit diamonds	Aggressive cutting action
Cooling holes	Cools blade when cutting heat generating materials

Contains deeper blade segments which increase the lifespan of the blade.

Suitable for wet or dry cutting.

Demolition Diamond Blades

- Brick - Concrete - Re-inforced concrete - Steel - Wood - Fibreglass

PART NO.	DESCRIPTION	QTY
RDBDEM115	115mm Demolition Diamond Blade	1
RDBDEM230	230mm Demolition Diamond Blade	1

Features	Benefits
Continuous rim	High quality finish

Suitable for wet or dry cutting.

Standard Tile Diamond Blades

PART NO.	DESCRIPTION	QTY
RDBSTDT115	115mm Standard Tile Diamond Blade	1
RDBSTDT230	230mm Standard Tile Diamond Blade	1

Features

Laser slot

Benefits

Quiet cutting

Suitable for wet or dry cutting.

Industrial Tile Diamond Blades

- Ceramic Tile - Porcelain

PART NO.	DESCRIPTION	QTY
RDBINDT115	115mm Industrial Tile Diamond Blade	1
RDBINDT180	180mm Industrial Tile Diamond Blade	1
RDBINDT230	230mm Industrial Tile Diamond Blade	

Diamond Blade Packs

PART NO.	DESCRIPTION	QTY
RDBSTD1153P	115mm Standard Diamond Blade 3 Pack	3
RDBSTD11510P	115mm Standard Diamond Blade 10 Pack	10
RDBSTD2303P	230mm Standard Diamond Blade 3 Pack	3
RDBSTD2305P	230mm Standard Diamond Blade 5 Pack	5

Standard Tile Blades

RUWAG HANDY HINT

- Ruwag Diamond Blades are dry-cutting blades that don't require water for cooling.
- Only use continuous rim tile blades when cutting tiles; a segmented blade will chip the tile.
- Only use the correct segmented blade for building materials, stone and granite, continuous rim blades don't resist heat as well as segmented blades.

CIRCULAR SAW BLADES

ATB

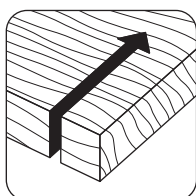

(Alternate Top Bevel)

Ground for ripping and cross-cutting in all types of wood.

TCG

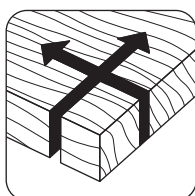

(Triple Chip Grind)

Ground for cutting hard materials like aluminium and plastic.

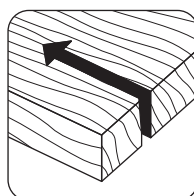

Crosscut Blade

Crosscut Circular Saw Blades are best suited for clean cutting across the wood grain in all types of wood.

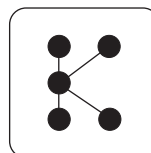

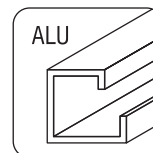

Combination Blade

Combination Circular Saw Blades are best suited for medium clean cutting both with and across the wood grain in all types of wood.

Ripping Blade

Ripping Circular Saw Blades are best suited for rougher and faster cutting with the wood grain in all types of wood.

Aluminium Blade

Aluminium Circular Saw Blades are best suited for clean cutting in aluminium and plastic.

Standard Circular Saw Ripping Blades

SANDING ACCESSORIES

Sanding disc selection chart

Orbital Sanders: Ideally suited for sanding large flat surfaces and corners. The rectangular sanding pad's orbiting motion makes this sander suited to: coarse to medium sanding: of bare and painted surfaces in wood and plaster; fine sanding: for producing fine sanded surfaces in wood.

Finish quality	✓	✓	✓	✓	✓
Removal rate	✓				
Flat surfaces	✓	✓	✓	✓	
Contours	✓				

Random Orbital Sanders: Ideally suited for sanding large flat surfaces and curves. The circular sanding pad's unique motion of orbiting and spinning at the same time makes this a versatile sander for: coarse to medium sanding: for fast removal of stock and painted surfaces in wood and plaster; fine sanding: for producing fine scratch free surfaces in wood.

Finish quality	✓	✓	✓	✓	
Removal rate	✓	✓			
Flat surfaces	✓	✓			
Contours	✓	✓	✓		

Ruwag sanding discs are available in the following grits.

Sander Type		Coarse	Medium	Fine
Random Orbital		60, 80	120	180, 240
Orbital		60, 80	120	180
Belt Sander		40, 60, 80	100, 120	
Angle Grinder		24, 36, 60, 80	100, 120	
Delta Sander		60, 80	120	240

Ruwag sanding discs are compatible with the following makes:
Bosch, AEG, Einhell, Festool, Hitachi, Kress, Makita, Metabo, Peugeot, Skil.

Belt Sanders: Ideally suited for heavy sanding of large surfaces. Aggressive stock removal makes this sander suited to the coarse sanding of: coarse to medium sanding: of bare and painted surfaces in wood e.g. doors and counter tops.

Finish quality	✓	✓			
Removal rate	✓	✓	✓	✓	
Flat surfaces	✓	✓	✓	✓	✓
Contours	✓				

Circular Sander: Ideally suited for tough sanding jobs on metal or wood. Aggressive and rapid stock removal makes this sander suited to the removal of: coarse to medium sanding: of welding joints, wooden seams, railway sleepers and fast removal of most materials, ideal for automotive refinishing.

Finish quality	✓				
Removal rate	✓	✓	✓	✓	✓
Flat surfaces	✓	✓			
Contours	✓	✓	✓		

Safety and usage guidelines

- Always unplug your sander before attaching the disc.
- Centre the sanding disc on a clean backing pad making sure to align the holes before pressing in place.
- Sand with light, even pressure.
- Always replace worn or damaged discs.
- Always wear the necessary safety equipment e.g. safety goggles and a dust mask.
- Always follow the tool manufacturer's recommended procedures and safety instructions.

Not suitable for grinding (specific to cutting discs)

WARNING!

Never use an angle grinder without the safety guard, it serves 3 purposes:

- 1) Directs the flight of sparks.
- 2) Prevents the use of oversized discs on the grinder.
- 3) Protects the user from debris in case the case of disc failure.

IMPORTANT!

When cutting, angle grinder should be configured so that sparks move away from your body.

WARNING!

Never use bigger discs on an angle grinder than is recommended. Following are examples of the peripheral speed of abrasive discs when used on a 115mm angle grinder.

Angle grinder size	Disc size	Peripheral speed (km/h)
115mm	115mm	288
115mm	125mm	314
115mm	178mm	446
115mm	230mm	577

Fasteners

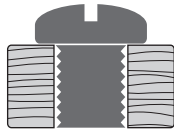

FASTENERS

TYPES OF SCREW HEADS

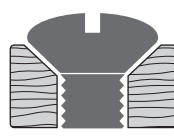

Countersunk

Flat screw head sits flush with the surface.

Pan Head

Rounded screw head sits above the surface.

Raised Head

Rounded screw head with countersunk sides.

SL

Slotted

Common slot recess for screw driving.

PH

Phillips

Common x-shaped recess for screw driving.

PZ

Pozi

X-shaped insert with 45° slits for added torque screw driving.

SQ or SD

Square Drive

Square shaped insert for added torque and secure screw driving.

RF-PICTPNS-15	Picture Nail & Cap Small	15

Pozi Bit

PART NO.	DESCRIPTION	QTY
RF-PB1025-2	Pozi Bit 1x25	2
RF-PB1050-1	Pozi Bit 1x50	1
RF-PB2025-2	Pozi Bit 2x25	2
RF-PB2050-1	Pozi Bit 2x50	1

Split Pin

PART NO.	DESCRIPTION	QTY
RF-PINSP1625-10	Split Pin 1.6x25mm	10
RF-PINSP2025-10	Split Pin 2x25mm	10
RF-PINSP2525-10	Split Pin 2.5x25mm	10
RF-PINSP2532-10	Split Pin 2.5x32mm	10
RF-PINSP2550-10	Split Pin 2.5x50mm	10
RF-PINSP3225-10	Split Pin 3.2x25mm	10
RF-PINSP3240-10	Split Pin 3.2x40mm	10
RF-PINSP3250-10	Split Pin 3.2x50mm	10
RF-PINSP4040-10	Split Pin 4x40mm	10
RF-PINSP4050-10	Split Pin 4x50mm	10
RF-PINSP5025-10	Split Pin 5x25mm	10
RF-PINSP5035-10	Split Pin 5x35mm	10
RF-PINSP5050-10	Split Pin 5x50mm	10

Shelf Support

PART NO.	DESCRIPTION	QTY
RF-SSB-4	Shelf Support Brown	4
RF-SSC-4	Shelf Support Clear	4
RF-SSO-4	Shelf Support Oak	4
RF-SSW-4	Shelf Support White	4

Screw Eye

PART NO.	DESCRIPTION	QTY
RF-SEB18-10	Screw Eye 18mm	1
RF-SEB20-10	Screw Eye 20mm	10
RF-SEB21-10	Screw Eye 21mm	10
RF-SEB30-10	Screw Eye 30mm	10
RF-SEB35-5	Screw Eye 35mm	10
RF-SEB40-5	Screw Eye 40mm	5
RF-SEB45-5	Screw Eye 45mm	5
RF-SEB50-5	Screw Eye 50mm	5
RF-SEB60-5	Screw Eye 60mm	5
RF-SEB65-5	Screw Eye 65mm	5

GENERAL HARDWARE

Cup Hook Round

PART NO.	DESCRIPTION	QTY
RF-RNDH12-10	Cup Hook Round 12mm	10
RF-RNDH12-100	Cup Hook Round 12mm	100
RF-RNDH19-10	Cup Hook Round 19mm	10
RF-RNDH19-100	Cup Hook Round 19mm	100
RF-RNDH25-10	Cup Hook Round 25mm	10
RF-RNDH25-100	Cup Hook Round 25mm	100
RF-RNDH32-10	Cup Hook Round 32mm	10
RF-RNDH32-100	Cup Hook Round 32mm	100
RF-RNDH40-10	Cup Hook Round 40mm	10
RF-RNDH40-100	Cup Hook Round 40mm	100

Cup Hook Square

PART NO.	DESCRIPTION	QTY
RF-SQH12-10	Cup Hook Square 12mm	10
RF-SQH12-100	Cup Hook Square 12mm	100
RF-SQH19-10	Cup Hook Square 19mm	10
RF-SQH19-100	Cup Hook Square 19mm	100
RF-SQH25-10	Cup Hook Square 25mm	10
RF-SQH25-100	Cup Hook Square 25mm	100
RF-SQH30-10	Cup Hook Square 30mm	10
RF-SQH30-100	Cup Hook Square 30mm	100
RF-SQH40-10	Cup Hook Square 40mm	10
RF-SQH40-100	Cup Hook Square 40mm	100

Wardrobe Hook DB

PART NO.	DESCRIPTION	QTY
RF-WRHKDCP-1	Wardrobe Hook DB	1

Wardrobe Hook

PART NO.	DESCRIPTION	QTY
RF-WRHKSCP-1	Wardrobe Hook S CP	1

Wardrobe Hook

PART NO.	DESCRIPTION	QTY
RF-WRHKsBR-1	Wardrobe Hook S SB	1

Drywall Indenter

PART NO.	DESCRIPTION	QTY
RF-RPDI225	Drywall Indenter	1

Door Wedge

PART NO.	DESCRIPTION	QTY
RF-WDPVCW-1	Door Wedge	1

Bath Plug BLK

PART NO.	DESCRIPTION	QTY
RF-BATHPB38-1	Bath Plug Blk 38mm	1
RF-BATHPB44-1	Bath Plug Blk 44mm	1

Steel Butt Hinge

PART NO.	DESCRIPTION	QTY
RF-SBUTH38-2	Steel Butt Hinge 38mm	2

Butt Hinge EB

PART NO.	DESCRIPTION	QTY
RF-BUTHEB100-2	Butt Hinge EB 100mm	2
RF-BUTHEB38-2	Butt Hinge EB 38mm	2

NOTES

This image shows a full page of blank, lined paper. It features approximately 30 horizontal blue or grey lines spaced evenly apart, typical of notebook paper. The lines extend across the entire width of the page, leaving small margins at the top and bottom. There are no vertical lines, text, or other markings on the page.

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
